
The two coordinates are experimentally separable: each intervention responds to exactly one
(a) the four conditions
I/x
self-replication
I/p
care directed at own lineage
E/x
generic scheduler
E/p
breeder favouring a named lineage
intrinsic C = I
extrinsic C = E
exchangeable A = 0
recipient-partial A = 1
(b) withdrawal of the external operator
responds to C
no effect
Φ_R/Φ_B
1.000
1.000
1.143
1.143
I/x
I/p
E/x
E/p
(c) relabelling of the recipient
responds to A
access of L1 / access of L0
0.989
exactly 0
0.989
exactly 0
